

Last 12 years we unite 6000+ attendees from 40 countries annually in Lviv. 5 stages, 4 expos, biggest startup competition of the country with millions of investments raised by winners every year.

In 2026, in Warsaw we seize all the international community who doubt to travel to Ukraine because of the full scale invasion but excited to visit one of the top notch tech events of Europe.

Watch the official aftermovies to learn more about the event

IT Arena 2025 brought together 6,450 participants from more than 40 countries — entrepreneurs, investors, engineers, and thought leaders — to show that even in wartime, Ukraine is creating solutions that define global trends. From September 26–28, 2025, Lviv once again became a place where thousands gathered to discuss the future of defense technologies, artificial intelligence, cybersecurity, business transformation, and the resilience of Ukraine's economy.

The 2019 edition brought together over 3,300 attendees from 38 countries for three days of exceptional content and valuable networking. IT Arena used the stadium as its main venue, featuring incredible expo zones and four impressive stages.
